

Tomáš Liška's "Invisible World" is a truly unique venture within the landscape of contemporary Czech music. The project's own musical compositions combine elements of Jazz, chamber music and from the Mediterranean and South-Eastern regions of the European continent.

Their approach is based on a philosophy where music is a clear and crystalline medium which irradiates a rich palette of emotional hues. These are inspired by strong melodies which are adorned by a subtle and seemingly effortless lacework of improvisation.

Invisible World performed on World & Jazz Festivals and venues across Europe, Africa, Japan, Scotland and United Kingdom. In 2017 was awarded the Audience Award on the international music conference Ostrava Music Crossroads and received the invitation on Ritmo Festival in Budapest. In 2018 got nomination on Czech "Grammy" award Ceny Andel in category Jazz & Blues.

The band was selected by the committee for the showcase at WOMEX 2018!

Efe Turumtay (violin) was born in Istanbul, Nikola Zarić (accordion) in Serbia and Kamil Slezák (drums) in Moravia. Tomáš Liška (upright bass) met all three in the course of his musical journeys around the world, while tirelessly searching for fascinating interactions between instruments and cultures which would enthrall both him and his audiences.

INVISIBLE WORLD

"A sophisticated blend of New and Old World influences, including Turkish violin, Balkan accordion and a pinch of tango nuevo.

The result leaves as much space for listeners as for the musicians. A great opportunity for music adventurers."

Petr Dorůžka, world music journalist & explorer
